## **APPLICATION FOR MEDICAL PAROLE**

TO : Shanghai Qingn Pu Prison

My son, Jude Shao, is currently incarcerated in the foreigners' unit of Shanghai Qing Pu Prison. For a long time, Jude Shao has been suffering from heart congestion of second degree, persistent back pain, and severe headache and insomnia due to chronicle neurasthenia. Although the prison doctors have made their best efforts trying to heal him using all the possible treatment available at the prison hospital, and the prison administration has also provided all kinds of care and consideration, his ailment continues to worsen and his health deteriorate, mostly due to the limitation of the present condition under which he is confined. In the opinions of medical experts, it is necessary for Jude Shao to receive proper and timely treatment in the US in order to recover and restore his health. Therefore, I earnestly submit this request for medical parole for Jude Shao. Your prompt consideration will be greatly appreciated.

Signed,

Guohua Lin

(Mother of Jude Shao)
